

Simplifying Field Services

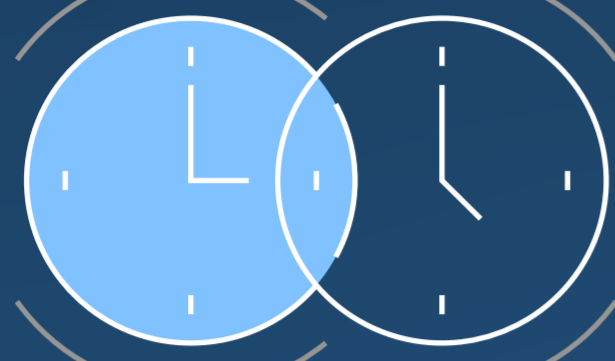

The 15 Benefits to Going Paperless

If you manage a service organization, you may experience challenges with scheduling and dispatching work, communicating customer needs, and updating any last-minute changes to planned work. Once a job is complete, your team needs to receive notice, understand what parts have been used, and who needs to be invoiced. If you're completing any or all of these processes manually, you could be dealing with bottlenecks and missed opportunities to streamline and grow your operation.

If you want to get rid of your reliance on paperwork and take advantage of the technology available — but don't know what going paperless could mean for you — then read our top 15 benefits here:

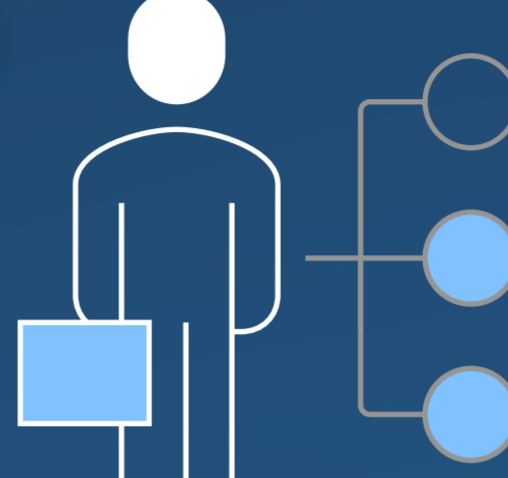

01

Save time on each job

02

Get more jobs done each day

03

Dispatch jobs instantly as they come in

04

Improve scheduling from real-time visibility of worker location

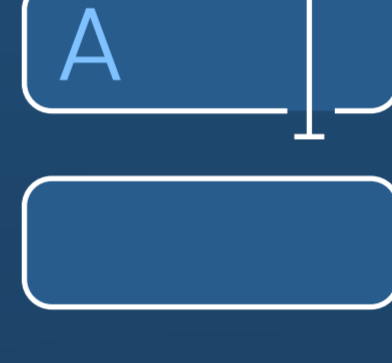

05

Centralize and share information with other systems in real-time

06

Input data just once

08

Eradicate missing and inaccurate information

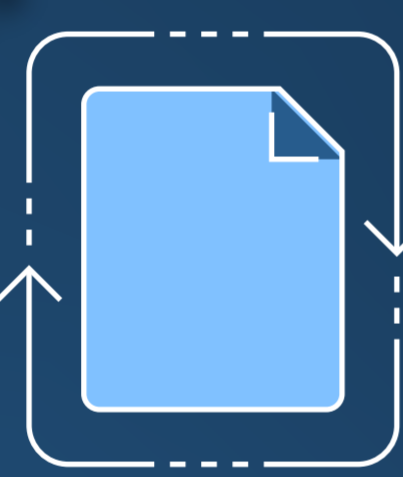

07

Provide customers with a quicker, more professional service

09

Eliminate the delay of paperwork getting back to the office

10

Document work electronically while on site

11

Reduce overtime filling out paperwork

12

Invoice immediately on job completion

13

Speed up cash flow by eliminating paper invoicing

14

Keep track of every part used on jobs

15

Create consistent workflows and data capture

FieldAware, the field service software from GPS Insight, leads the way in simplifying field service management.

Our mobile and web-based field service solutions resolve the problems many service companies face with paperwork.

Go paperless with automated scheduling, and dispatch of work orders through to our easy-to-use mobile app which lets field workers access, document, and share information all at the touch of a button — even invoice while on site. With FieldAware's seamless integration, you can also update back office systems instantly.

Increase hours to produce revenue, reduce lost time, and decrease service completion time from days to minutes.

Going paperless could be simpler than you think.
